## 1.Download APP

Search and download “Smart Life” in major application markets or scan the QR code below to download the APP.

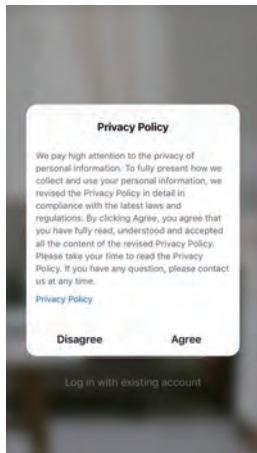

## 2.Registration/Login/Forgot Password

### 2.1 Registration

Register

Agree the privacy policy

## 2.1 Registration

The 'Register' screen features a back arrow in the top left, the title 'Register' at the top, and a status bar at the top showing 'No SIM', signal strength, and time '15:42'. Below the title is a text input field with the placeholder 'China +86'. Underneath is a blurred text input field. A large, rounded 'CONTINUE' button is centered below these fields. At the bottom, there is a link that says 'Log in with [Service Agreement](#) and [Privacy Policy](#)'.

Enter your phone number  
or email address

The 'Enter verification code' screen has a back arrow in the top left, the title 'Enter verification code' at the top, and a status bar at the top showing 'No SIM', signal strength, and time '15:43'. It features a blurred text input field for the verification code.

Enter the verification code  
you received

The 'Set Password' screen includes a back arrow in the top left, the title 'Set Password' at the top, and a status bar at the top showing 'No SIM', signal strength, and time '15:45'. Below the title is a red error message: 'Password must contain 6-20 characters, including  
alphabets and numbers'. Below this is a blurred password input field.

Set your password

## 2.2 Login

### Account ID + Password Login

- Select the country/region you are in
- Enter the phone number or email you have registered and the password to login

## 2.2 Login

### Verification Code login

The image displays three sequential screens from a mobile application, illustrating the login process using a verification code.

**Screen 1: Log In**

- Country code: China +86
- Phone number input field
- Password input field
- Forgot Password link
- Login with SMS button (highlighted with a red box)
- Social Login section with icons for Apple and Google
- Footer: I Agree [User Agreement](#) and [Privacy Policy](#)

**Screen 2: Login with SMS**

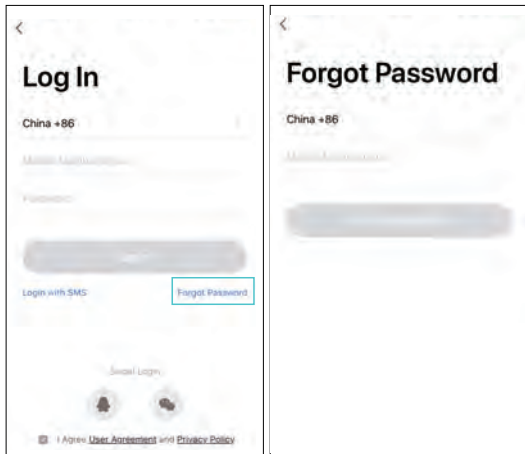

- Country code: China +86
- Phone number input field
- SMS code input field

**Screen 3: Enter Verification Code**

- Verification code input field

## 2.3 Forgot Password

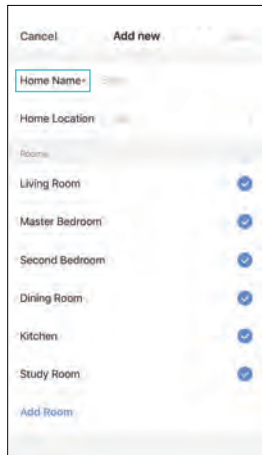

If you forgot your app password, you can reset your password by following steps.

1. Click "Forgot password".
2. Select the country/region you are in. Enter the mobile phone number or email you used to register.
3. Enter the verification code you receive in SMS or email.
4. Enter the new password to reset.

### 3. Home/Member management

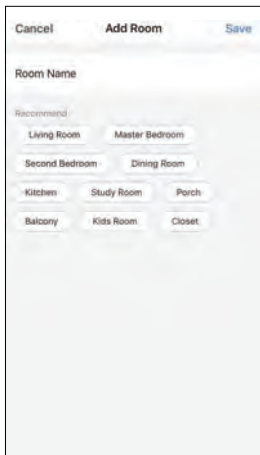

Click “Me” in the lower right corner and choose “Home Management” to enter the page.

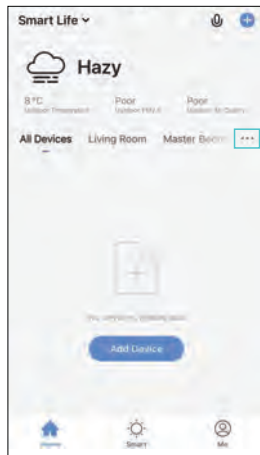

Enter the family name

Set the family location

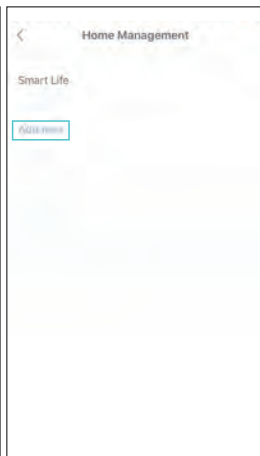

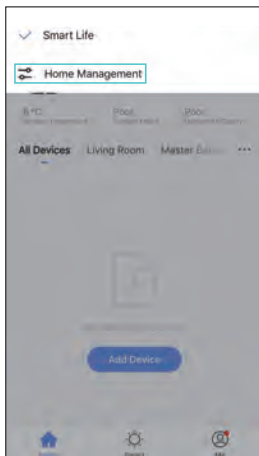

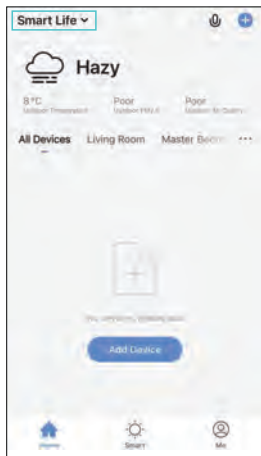

Add a room and enter a name

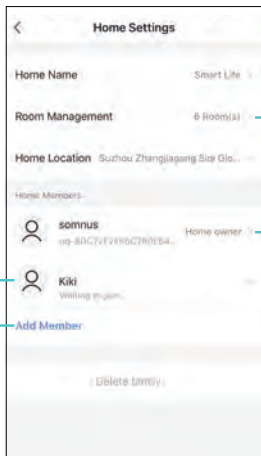

Change room settings

Add and manage families.  
(One account can manage multiple families at the same time. )

Click the home name to go to home settings page.

1. Edit the rooms in the home and manage the devices in the rooms.
2. Home owner has the highest access. It can manage all the devices, rooms, smarts, administrators and members in the home. Administrator can manage devices, rooms, smarts and members. Member can only use devices and smarts.
3. After the invitation is sent, "Waiting to join" will be displayed before confirmation.
4. Home owners can click here to invite other people to join this home.

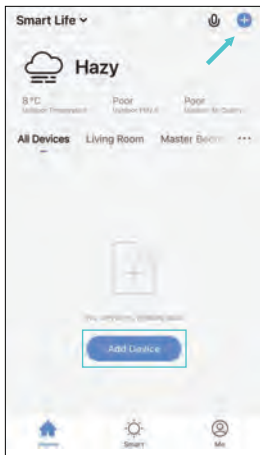

If you are invited to a home, you will receive a pop-up notification in the App. You can choose to accept or refuse it.

You will also receive a notification in the message center.

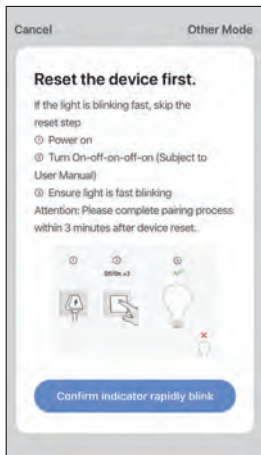

## 4.Add devices

### 4.1 Add Manually

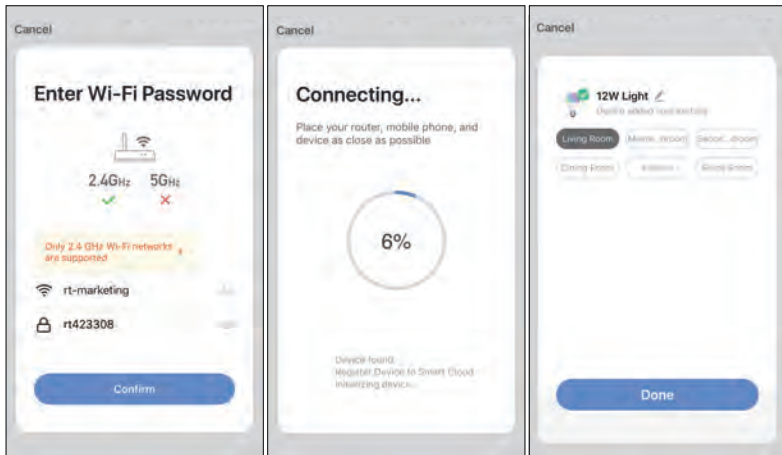

Click “Add Devices” or “+” in the top right corner to enter add device page.  
Select “Lighting Wi-fi” to the next page.

## 4.1 Add Manually

- Reset the device according to the steps on the phone.
- Make sure the smart light is flashing rapidly and then click the button to proceed to the next step.

## 4.1 Add Manually

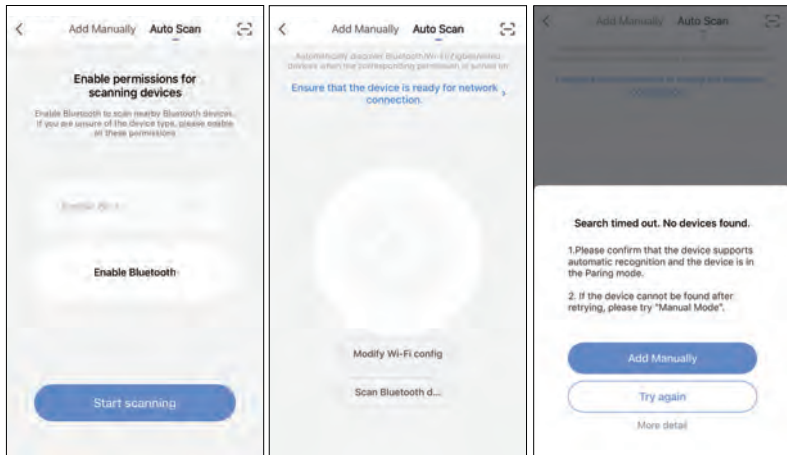

Connect Wi-fi

Connecting

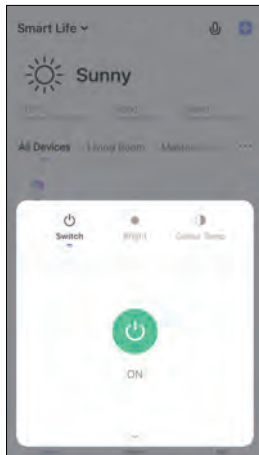

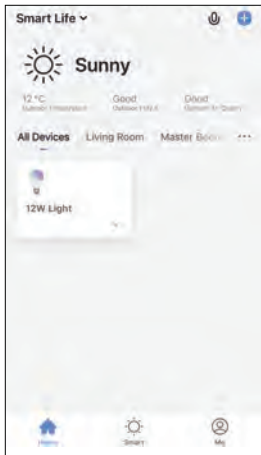

Give the light a name  
and choose a room for it

## 4.2 Search Device

- Search the lights through Auto Scan.
- When using “Auto Scan”, please reset the lights and enable Wi-fi of the phone.
- If the search times out and no lights are found, please follow the instructions to solve the problems. Or you can choose to add them manually.

## 5.Device Control

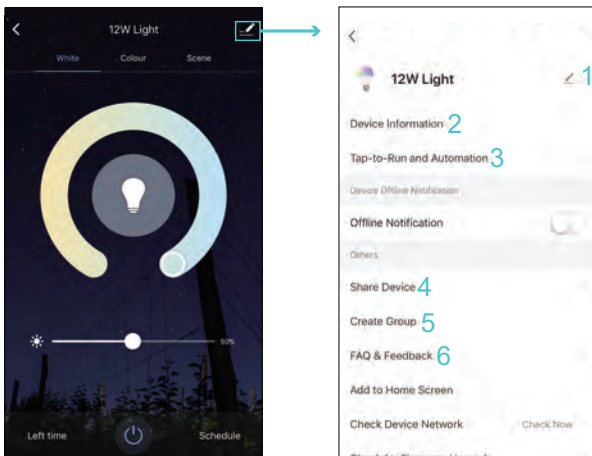

- A light icon will appear in "All Devices" when the light completes pairing successfully. Now you can click on the icon to enter the control panel of the light or use the common functions to control the light.
- When the light is offline, the icon will show "Offline" and the light is unable to operate.

## 5.1 Individual Control

Open the control panel. When the light is off, only "Left time" and "Schedule" can be set. When the light is on, you can set "Scene, Color, Brightness, Left time and Schedule".

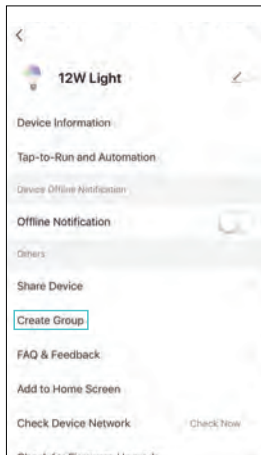

## 5.2 Device Management

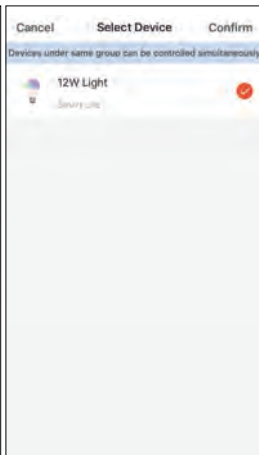

1. Edit the icon, name and location.
2. View the light's ID, IP address, Mac address etc.
3. Turn on/off or edit the recommended Automation setting.
4. Share lights with others by entering a phone number/email.  
(The phone number/email must have registered for smart life.)
5. Control the lights with the same type by creating groups for them.
6. View the FAQ to get help and give feedback if you have any problems.

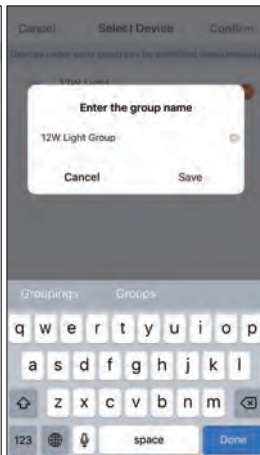

## 5.3 Group Control

Create group

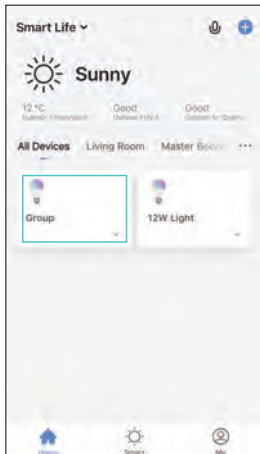

Select devices

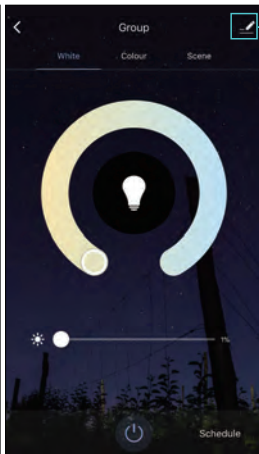

Enter the group name

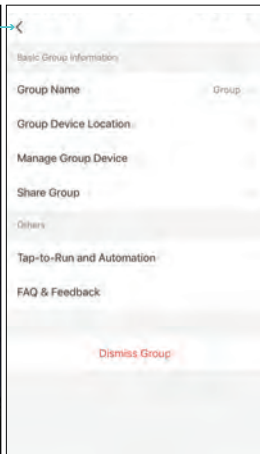

## 5.3 Group Control

The icon shows

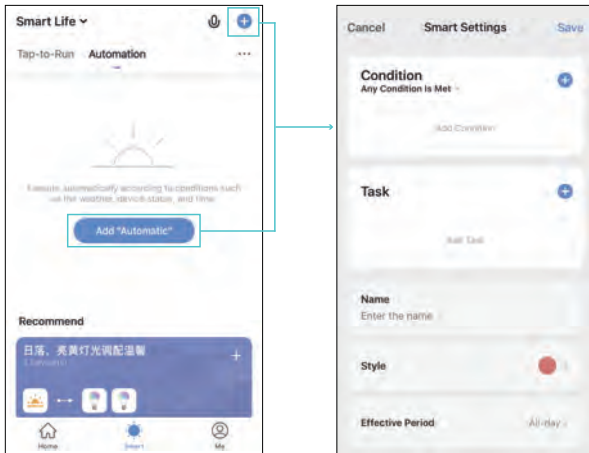

Control the lights together

Edit the group information

## 6.Smart
